## BIBLIOGRAPHY

### Publications on health and human rights themes:

1982-1997

This bibliography makes no claim to completeness. Rather it is a selected listing of papers, articles and books listed under different thematic headings with an emphasis on publications which can be retrieved from medical or other libraries. For articles prior to 1982, see earlier AI bibliographies (for example, *Bibliography of publications on health and human rights themes*, AI Index: ACT 75/03/93, 30 September 1993). Some attempt has been made to provide keywords as a guide to the contents of articles but these are rudimentary. We have tried to provide sufficient information for each publication to allow a reader to obtain a copy through normal library request. Where readers are unable to obtain copies, Amnesty International may be able to suggest possible alternative sources. In general, though, this is a "help yourself" bibliography.

We would welcome any corrections to entries which are incomplete or in error and we apologise to any author whose paper is not listed here and should be.
