SELECTED BIBLIOGRAPHY ON THE HEALTH PROFESSIONS AND HUMAN RIGHTS

Summary

Attached is an updated edition of the bibliography for medical groups which replaces those of 27 April 1984 (ORG 44/02/84) and 1 April 1987 (ORG 44/01/87). This version contains nearly all the references contained in the earlier bibliographies plus those added since 1987. In future, supplements will be issued to update the main document. New entries are marked with an asterisk [*].

Distribution

This circular is being sent to medical groups and to sections.

Recommended Actions

1. Medical groups should make this bibliography available to group members interested in the medical and human rights literature and to anyone seeking bibliographic information from the medical group.
2. Groups should notify the Medical Office of any significant omissions in this bibliography and, if possible, forward copies of relevant articles to the International Secretariat.

SELECTED BIBLIOGRAPHY ON THE HEALTH PROFESSIONS AND HUMAN RIGHTS

The attached bibliography lists articles and books on aspects of medicine and human rights. Publications are in English unless indicated otherwise. Where a publication has more than three authors, only the first is named. (This replaces earlier AI medical bibliographies ORG 44/01/87, 1 April 1987; ORG 44/02/84, 27 April 1984; and ORG 44/15/81, 29 October 1981.)

Publications are arranged in seven categories:

- 1) Torture and exile -
 - 1.1 General
 - 1.2 Physical and psychological sequelae
 - 1.3 Health care
 - 1.4 Torturers
 - 1.5 Medical profession
- 2) Medical Ethics and Human Rights
- 3) Death Penalty
- 4) Mental Health and Human Rights
- 5) Prison Medicine
- 6) Forensic Science and Human Rights
- 7) Reports of Medical Investigative Trips

To avoid duplication, publications are usually listed only once under the most appropriate heading but can, of course, be relevant in more than one subject area. In some cases, only the latest article in a series by the same author has been included.

The bibliography is not a definitive one and for further references groups are referred to some of the items listed here which themselves have extensive bibliographies, notably:

Léry N, Labarthe JF. *Torture: Bibliographie*, Lyon: Université Claude- Bernard, 1984.
(1019 references)

Radelet ML, Vandiver M. *Capital Punishment in America: An Annotated Bibliography*. New York: Garland, 1988. (1011 references)

Stover E, Nightingale E (eds.). *The Breaking of Bodies and Minds*, New York: W H Freeman and Company, 1985. (198 references)

The fullest biographical details available have been given to allow individuals to obtain copies via normal medical library services. If you do have difficulty in obtaining any of the publications listed here, please contact the Medical Office at the International Secretariat.

The inclusion of a publication in this bibliography does not necessarily indicate Amnesty International's support for the views expressed therein, which remain those of the authors.
