# DISPLACED BY DROUGHTS AND FACING STARVATION

## Damisoa

📍 Madagascar

In 2021, Damisoa and his family fled famine in Madagascar's southern Androy region. Hoping for a better life in Boeny, in the north, they were instead placed in a resettlement site with poor housing, water and sanitation.

People displaced by famine and now living in Boeny urgently need

humanitarian assistance, but aid is almost exclusively concentrated in southern Madagascar.

**Demand that the government takes urgent steps to address the hunger, homelessness, poor healthcare and other hardships faced by Damisoa and others displaced by drought across Madagascar.**
